

# FirstRain Release Notes

**Version: FR 2021.01**

**Release Date: 11/Dec/20**

## **Defects Resolved:**

- Service initialization fails when infinispn caches are corrupted -The service will throw the exception and abort its initialization. Trying to open it's healthcheck URL will throw an error 404.
- Failed at Step 6 Step 6 failed: Channel name is not updated. Channels RHS bar displays previous entry of Channel Name & Interest.
- Newly Starturls not getting changed to Mode 2 - The Pipeline will spend a long time waiting for the return of a query. The query will time out after 30 minutes, causing the Pipeline execution to fail.
